About Me

Enthusiastic and motivated Computer Engineering Apprentice eager to learn and develop new skills. Interested in programming, web technologies, and teamwork. Currently seeking an opportunity abroad to gain practical experience, improve my language skills, and broaden my perspective in an international environment.

Soft skills

- Creativity
- Adaptability
- Teamwork

Hard skills

- Programming Languages
- Web Development
- Database Management

Education

- University of Artois**
1st and 2nd years of Bachelor's degree 2021 - 2023
 - Object-Oriented Programming (Java): Introduction to OOP concepts and development in Java
 - Front-End Web Development (JavaScript): Basics of web design and interactivity with JavaScript
 - Unix Commands, Database Implementation and Management: Practical use of Unix commands; basic database setup and management
 - Game Development in Python and Java: Designed simple games using Python and Java
- University of Sorbonne Paris Nord**
Software Engineer 2023-2027
 - Programming and Languages: Basics of Python, Java, C; algorithms; coding principles
 - Computer Architecture, Systems and Networks: Fundamentals of hardware, operating systems, and networking
 - Information Systems and Software Architecture: Introduction to information systems and software design
 - Business Culture: Fundamentals of teamwork and workplace culture
 - Basic Engineering Tools: Use of standard engineering and productivity tools

Experience

- IT Product Manager Apprentice**
GRDF | Information Systems Department 2023-2024
 - Gained hands-on experience with middleware administration tools such as Tomcat, Apache, Ansible, and Centreon
 - Assisted in managing the change and incident backlog using ServiceNow, providing a transversal view of ongoing tasks and priorities.
 - Participated in project committees and contributed to transition phases from project delivery to operations (RUN).
- Software Engineer Apprentice (3 years)**
GE Healthcare | Interventional Software Apps 2024 - 2027
 - Enhanced a dashboard for the company intranet, integrating real-time metrics and user-friendly visualizations.
 - Designed and implemented a full web prototype of a medical application enabling volumetric image reconstruction and visualization of medical images.
